

## TAKE IT FOR A SPIN.

Roulette is a game of pure chance. You bet on where the ball is going to land on the roulette wheel.

To bet, place your chips in any combination on the table layout.

While it's fun to look for patterns, every spin is random.

What happened before is no more or less likely to come up on the next spin.

# Let's play

- 1 Join a game by purchasing chips from the dealer.
- 2 Unlike other casino games, each player's chips are a different color. These "non-value" chips are used only at the table you purchase them on.
- 3 Bet on a single number, several single numbers, a group of numbers, or groups of numbers.
- 4 The dealer will spin the wheel and call "no more bets".
- 5 Players win if their bets are placed on the winning number or on the winning section.
- 6 All outside bets lose if the ball lands on '0' or '00'.

## PEARL OF GAMESENSE

Some U.S. casinos offer 'European style' or 'Single Zero' Roulette.

In Single Zero Roulette, when Zero hits, all bets on the Outside lose.

All bets pay the same except the TOP LINE BET which pays 8 to 1. There is no COURTESY LINE BET on these tables.
